Lene MARTIN
EVER President 2011

Dear EVER members, fellow scientists, friends and colleagues!

It is with great pride I welcome you to the 14th annual meeting of the European Association for Vision and Eye Research.

As in previous years EVER offers numerous free papers and posters, with opportunities for discussions and exchanges of ideas. We also have really distinguished keynote speakers, providing updates regarding genetics, immunology, electrophysiology and ocular surface properties.

The numerous special interest symposia (SIS) deal with many topics in the wide field of ophthalmology. In addition, courses and workshops, with many prominent invited speakers, will serve as valuable sources of information for scientists and clinicians alike.

As usual, the dedicated work of section chairs and secretaries, under the wise guidance of our experienced program secretary, have managed to create a rich content and make this meeting a high quality environment for professional and scientific development.

For the second year EVER profits from the superb conference facilities at Creta Maris Convention Center by the beautiful coastline of the Aegean sea.

This agreeable venue certainly adds to the positive EVER experience.

On behalf of the EVER organization I thank you all for coming - and for your contributions to knowledge development in our important field.

COURSES OVERVIEW

The 14 courses throughout the EVER 2011 congress:

Wednesday, October 5, 12:00 - 14:15

1. NSPH: The swollen optic disc: Is it true swelling	25
2. ACB: In vitro techniques for ocular cell biology and tissue engineering.....	25
3. COS: Common corneal procedures	26
4. IM: EBO review course : Intraocular inflammation and infection (Part I).....	26
5. PO: EBO review course : Diagnostic of ophthalmic tumours	27

Wednesday, October 5, 14:30 - 16:45

6. COS: Facial nerve palsy: anatomy	28
7. COS: Corneal infectious diseases update	28
8. COS: Basic keratoprotheses.....	29
9. IM: EBO review course: Intraocular inflammation and infection (Part II).....	29

Thursday, October 6, 8:15 - 9:45

10. COS: Corneal ulcerations: from bench to slit lamp	36
-------------------------------------------------------------	----

Thursday, October 6, 17:30 - 19:00

11. G: EBO review course: How to begin with the glaucomas?	54
12. PO: Crash course in ophthalmic pathology.....	54

Saturday, October 8, 8:15 - 9:45

13. COS: Optical coherence tomography applications in anterior segment eye diseases	89
-------------------------------------------------------------------------------------------	----

Saturday, October 8, 11:00 - 12:30

14. IM: Angiography and fundus imaging in uveitis: principles & practice.....	95
-------------------------------------------------------------------------------	----

IT and website support by RESILION

EVER is a non-profit organisation. The aims of the association are to encourage research and the dissemination of knowledge concerning the eye and vision by means of meetings, publications and exchange of information.

EVER is the largest European scientific organization which covers all subspecialties of ophthalmology and visual sciences. It provides an umbrella for other ophthalmological societies to meet during its annual congress.

Membership

Membership is open to individuals of any nationality, engaging in or with an interest in ophthalmic and vision research.

Applications for membership - available on www.ever.be - may be submitted at any time, membership is on calendar year basis and starts on January 1.

Every member must select one of the 11 Scientific Sections that best represents his or her primary area of interest.

The benefits of EVER membership are:

- submission of abstracts to EVER annual meeting
- reduced registration fee for EVER annual meeting
- organizing Special Interest Symposia (SIS) and courses during the EVER annual meeting
- participating in the EBO review courses
- EACCME granted 21 European CME credits (ECMEC) recognized by the American Medical Association- for the EVER annual meetings
- voting rights for the election of the Board Members (except members-in-training and emeritus members)
- 25 travel grants for best papers to attend the EVER annual meeting
- free electronic subscription to the EVER journal, Acta Ophthalmologica (IF2,909)
- quarterly E-Newsletter
- e-alerts
- member of CONCORDIA

Elections

This year new representatives of the scientific sections Immunology/Microbiology and Physiology/Biochemistry/ Pharmacology will be elected through electronic voting. Voting 2011 will close on October 7, midnight.

The result of the elections will be announced at the General Assembly on Saturday October 8, 2011.

The scientific sections will hold their Business Meetings on Friday, October 7, 2011 from 12:35 - 13:35. Sandwiches and refreshments are provided. The agenda is available on page 73.

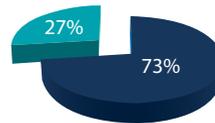

The following 2 sections will nominate at least 2 candidates for the succession of their representatives in the Board of EVER for elections in 2012:

- Cornea / Ocular Surface
- Glaucoma

The term of Secretary General is coming to an end. Elections for a new Secretary General will be open to all full members from 2012 on. The list of candidates will be available on the member's web page.

The statutes and by-laws are available on the website: www.ever.be » about » statutes.

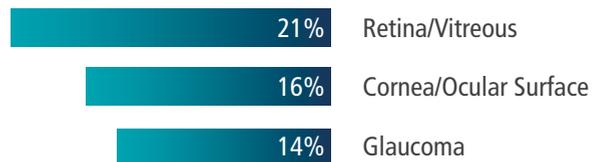

Participants:

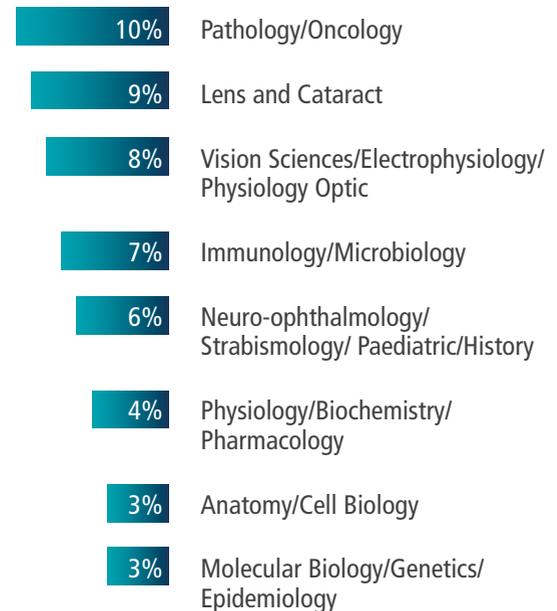

Clinical with or without research: 73 %
Research only: 27 %

Venue

EVER 2011 will be held at the Creta Maris Convention Center in Hersonissos, Crete, Greece.

⇒ visit the website on www.maris.gr

The scientific programme of the EVER congress starts on Wednesday, October 5 at 12:00 and concludes on Saturday, October 8 at 19:30.

Cancellation policy

Refunds – up to 75% of the advance registration fee will be granted for cancellation received in writing prior to September 20, 2011. Refunds will not be granted for later cancellations or no-shows.

Website

The EVER website www.ever.be has a central role in the EVER organisation. At this website, you can

- obtain up-to-date information about the scientific programme and the EVER 2011 meeting and view the status (session, hour, place) of your presentation
- pay on-line and obtain an overview of past payments
- look for other EVER members
- access general information about EVER
- access Acta Ophthalmologica, the EVER journal
- [cast your vote for officers](#)
- print your CME certificate after the congress

Registration

Everyone attending the scientific sessions - whether or not an EVER member, invited speaker, accompanying person or presenter - must register and pay the registration fee.

On-site registration starts on Wednesday, October 5, 09:00.

Please note that:

- being or becoming an EVER member – or having an abstract accepted – does not imply that you are registered
- if you register as a member-in-training, you need to prove your traineeship with a document signed by the Head of your Department
- registering as an accompanying person entitles you to attend the EVER social events, but not the scientific programme

Housing / Travel

SUMMERLAND Travel S.A. has negotiated special rates for accommodation in several categories of hotels in the congress venue area.

Registration fees on-site

	EUR	EUR
EVER member	350	275 *
SIS-invited speaker	350	275 *
Member-in-training	175	140 *
Non-member	570	460 *
Non-member-in-training	280	220 *
Course	50	30 *
Accompanying person	115	115 *

* Citizens of these listed countries only: Albania, Algeria, Armenia, Belarus, Bosnia and Herzegovina, Bulgaria, Congo, Croatia, Czech Republic, Egypt, Estonia, Georgia, Hungary, India, Iran, Latvia, Libya, Lithuania, Macedonia, Moldova, Montenegro, Morocco, North Korea, Ouzbekistan, Pakistan, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Tunisia, Turkey, Ukraine. The list of countries will be updated annually and is based on the membership roster.

Creta Maris can be reached from Heraklion airport. Transfer from Heraklion airport to your hotel can be booked through the EVER housing bureau SUMMERLAND Travel S.A.: www.evercrete.gr

Round trip transfer from/to the airport 30 EUR (per person).

By arrival at Heraklion airport, you will find the SUMMERLAND hospitality desk in the arrival hall.

The transfer takes about twenty minutes.

Weather

In October, the temperature remains friendly, averaging around 25°C.

Tourist information

Crete - the largest island in Greece - is an island with an exquisite 1.000 kilometer-long coastline dotted with numerous coves, bays and peninsulas, which afford a multitude of soft, sandy beaches along the beautifully blue Mediterranean Sea. After all, it's among the finest in the world and has established Crete as one of Europe's most popular holiday destinations. And, of course, the island's historic importance in today's world as the home of the Minoan civilization with important archeological finds at Knossos, Phaistos and Gortys, is evidenced by the tens of thousands of visitors to these sites each year.

Social programme

The social programme is open for all participants and registered accompanying persons:

Wednesday 19:00

EVER welcome reception at Zeus Terrace

Saturday 20:00

EVER Farewell dinner in Creta Maris

Coffee

Included in the registration fee are the coffee and soft drinks throughout the meeting from 09:45 until 11:00 and from 15:30 until 17:25 and the sandwiches and refreshments at the time of section business meetings on Friday 12:35-13:35.

Internet access

Wi-Fi internet access will be provided in the Convention Center.

Photographs

It is strictly forbidden to take photographs or videos of the presentations in the lecture Halls.

Publication of the abstracts

The abstracts of the EVER 2011 congress is published on-line in a special issue of Acta Ophthalmologica, the EVER journal. Access through EVER homepage.

GENERAL INFORMATION

Withdrawals

First authors unable to attend EVER for reasons beyond their control, may request permission of the Programme Secretary to have another author present the paper. Alternatively, they should send a written notice of withdrawal to the EVER Office before September 20, 2011.

No-shows

Please note that any first author, whose paper or poster, once it has been accepted, is not presented without a valid excuse, will be prohibited from presenting papers at EVER for the next two years.

CME - Continued Medical Education credits

The European Accreditation Council for Continuing Medical Education Institution of the UEMS, EACCME has granted 21 European CME credits (ECMEC) to the EVER 2011 congress on Oct 5-8 in Creta Maris, Crete, Greece.

CME credits certificate can be printed from the EVER website after the congress.

Liability

The organisers cannot accept liability for personal accidents, loss of or damage to private property of participants and accompanying persons either during, or directly arising from the Meeting. Participants should make their own arrangements with respect to health and travel insurance.

Poster Prizes

A poster prize of 200 EUR will be awarded for the best poster in each section. An additional VEP poster prize will be generously sponsored by the Alta Eficacia Tecnologia, SL, Spain.

The winners will be chosen by the moderators and will be announced in the General Assembly followed by the prize giving ceremony on Saturday October 8.

Please make sure to attend. No prize will be given after the congress.

EVER supported SIS

EVER supports the following SIS with 1.000 EUR each:

- Ionizing radiation and cataract, organized by Jochen GRAW
- Doctor I can't see in the dark, organized by Graham HOLDER
- Ocular Rigidity and Hydrodynamics of the Human Eye, organized by Anna DASTIRIDOU and Ioannis G. PALLIKARIS

Guidelines for speakers and handling presentations

EVER 2011 offers a high-performance network between all the different presentation rooms.

All presenters must read the following instructions:

- Uploading of presentation in [Speakers room](#) starts from Wednesday, October 5, at 11:00.
- The supported software for presentation is PowerPoint, Keynote is not allowed. All presentations will be presented at a resolution of 1024 by 768 pixels. When using videos, WMV and AVI are the most used video formats. Save the videos used in your presentation on your CD/USB memory stick.
- Read the Guidelines for preparation of a Powerpoint presentation.
- [Include your conflict of interest statement in the first slide.](#)
- Oral presentations in the free paper sessions are limited to eight minutes, followed by four minutes of discussion. The session chairman will strictly enforce this schedule.
- Rapid fire presentations should last no longer than 3-4 minutes with a 2 further minutes for questions from the audience. We strongly recommend that you do not use more than 2-3 PowerPoint slides for the rapid fire presentations.
- In the Speakers room, a technician helps the speaker to transfer his or her presentation into the central congress network. When the transfer is complete, the technician performs a quick run of the presentation so the speaker can check whether the presentation runs correctly and all parts of the presentation are copied. Desktop computers will be available at the Speakers room for last minute changes and reviewing your presentation, if needed.
- Inside each presentation room, a technical assistant starts each presentation at the right time using one of our fixed computers connected to the central congress network. When the presentation is launched, the speaker has control and can navigate with a remote device.
- We do not allow the use of personal laptops for presentations. If you bring your laptop to the congress, the technician will copy the files on your hard disk of the laptop into the central congress network, so the laptop will no longer be needed. Of course, the easiest way is to bring your presentation on CD, DVD or memory stick. E-mailing or up-loading of presentations is not encouraged but can be used in special circumstances.
- Download the EVER 2011 Master Slide freely available for your presentations.

At the end of the congress, all presentations will be deleted so that no copyright issues will arise.

Guidelines for posters

Posters must be brought to the congress by the presenting author and should not be mailed in advance. The required dimensions are 190 cm (width) by 95 cm (height).

NOTE: Landscape shape. Include your conflict of interest statement in your poster.

Each printed poster is exhibited for one day only. All posters should be erected between 08:00 and 09:00 on the day of presentation and must not be removed until 19:00. EVER is not responsible for any poster left behind at the end of the day.

You are required to stand beside your poster during the poster session. On Thursday and Friday from 16:15 to 17:25, on Saturday from 15:20 to 16:25. During this time, moderators will be voting which poster should win the poster prize.

Some authors of posters, selected by the programme committee, will be invited to give a brief rapid fire oral presentation.

All posters have to be presented in printed form. You have an option of submitting your poster also electronically. The e-posters will be display throughout the meeting.

EVER listed countries travel grants

We are pleased to announce that the following 15 members younger than 40 year in age from listed countries will receive a travel grant for the amount of 400 EUR:

- **ACB - Rêka ALBERT - Hungary**
3136 - Mesenchymal-like stem cells from human corneal stroma grown in medium containing human serum as the only supplement
- **RV - Adrienne CSUTAK - Hungary**
357 - Diabetic retinopathy screening with computational support
- **COS - Dariusz DOBROWOLSKI - Poland**
4374 - Cultivated oral mucosa epithelium transplantation (COMET) in bilateral limbal stem cell deficiency
- **LC - Marie KALFERTOVA - Czech Republic**
254 - Evaluation of posterior capsule opacification after cataract surgery using liquifaction method
- **MBGE - Gergely LOSONCZY - Hungary**
261 - Identification of novel germline mutations in the VHL gene in Hungarian von Hippel-Lindau patients
- **RV - Anna MACHALIŃSKA - Poland**
3216 - AMD and atherosclerosis coincidence: the role of complement system activation and endothelial dysfunction
- **MBGE - Ireneusz MAJSTEREK - Poland**
265 - Evaluation of MMP-1 gene expression variants as a risk factor of primary open-angle glaucoma
- **MBGE - Dorota NOWAK - Poland**
260 - Analysis of locus 2q13 in Ecuadorian family with keratoconus
- **PO - Mykolas PAJAUJIS - Lithuania**
437 - Anterior segment OCT and histopathologic data in conjunctival, limbal and subconjunctival tumours
- **VEP - Przemyslaw PAWLOWSKI - Poland**
464 - Electrophysiological assessment of fundus albipunctatus
- **G - Donatas PETROSKA - Lithuania**
235 - Digital analysis of the trabecular pigmentation using positive pixel count algorithm
- **RV - Simona STECH - Lithuania**
340 - Responce to intravitreal bevacizumab for macular edema following central retinal vein occlusion in patients with pseudoexfoliation syndrome
- **RV - Katalin TOTH-KOVACS - Hungary**
3211 - Association of Alzheimer's disease and age-related macular degeneration
- **NSPH - Magdalena WASIK - Poland**
309 - Relationship between optical coherence tomography and visual evoked potentials in patients with parasellar tumours without chiasmal compression
- **RV - Olesya ZIYATDINOVA - Russia**
3217 - Ranibizumab for the treatment of exudative age-related macular degeneration associated with retinal pigment epithelial detachment

EVER travel grants

We are pleased to announce that the following 11 members have received a travel grant of 500 EUR each from the EVER Sections:

- **ACB - Goran PETROVSKI - Hungary**
2132 - Resveratrol, rapamycin and MG-132 as inducers of autophagy in ARPE-19 cells
- **COS - Claudia CURCIO - Italy**
4372 - CREB is involved in growth of pterygia
- **G - Omar MAHROO - UK**
4151 - Outcomes of trabeculectomy with transconjunctival application of mitomycin C
- **IM - Magdalena BAZEWICZ - Belgium**
429 - Effect of SOCS1 overexpression on RPE cells activated by cytokines
- **LC - Marzieh KOHANDANI TAFRESHI - France**
2365 - Semi-automatic 3D reconstruction of the anterior segment from high frequency ultrasound scans
- **MBGE - Pete WILLIAMS - UK**
2121 - Changes in retinal neuronal connectivity in a mouse model of dominant optic atrophy
- **NSPH - Hafid KHAYI - France**
306 - Association between non-arteritic anterior ischaemic optic neuropathy and sleep apnoea syndrome
- **PBP - Sarah VAN DE VELDE - Belgium**
3323 - Topical application of AMA0076, a locally acting rho kinase (ROCK) inhibitor, results in a robust IOP control in a hypertensive rabbit model
- **PO - Mieke VERSLUIS - The Netherlands**
3362 - ERK activation and monosomy 3 are associated with Src expression in uveal melanoma and may serve as biomarkers for dasatinib treatment
- **RV - Matus REHAK - Germany**
4112 - The effect of anti-VEGF treatment and triamcinolone in experimental retinal vein occlusion
- **VEP - Guillermo PEREZ - Spain**
4325 - Assessing the wavelength dependence of intraocular scattering by a new optical approach

Alta Eficacia Tecnología SL, Spain, travel grant

Alta Eficacia Tecnología is pleased to announce a travel grant of 400 EUR for the best paper in the VEP section

- **Christian CASANOVA - Montreal**
4321 - Spatio-temporal responses in the visual cortex evoked from first and higher order thalamic nuclei in tree shrews: a voltage sensitive dyes study

In CONCORDIA pro VISU

The following societies collaborate with EVER to unify European ophthalmology by promoting quality education in ophthalmology and its scientific foundations:

EBO - European Board of Ophthalmology

The European Board was founded in 1992 to guarantee the highest standards of care in ophthalmology in the countries of the European Union by ensuring that the training is raised to the best possible level. It makes recommendations regarding the standards and syllabus for training ophthalmologists, assesses the content and quality of training by site visits and the annual EBO Diploma Examination, facilitates the exchange of trainees and teachers, and promotes CME in ophthalmology. EBO works under the Section of Ophthalmology of the European Union of Medical Specialists (UEMS). During the EVER meeting, EBO organises review courses open to all delegates since 2007, see pages 26, 27, 29 and 53.

ebo-online.org

EVER - European Association for Vision and Eye Research

We aim to encourage research and the dissemination of knowledge concerning the eye and vision by means of meetings, publications and exchange of information. EVER is the leading ophthalmological research association in Europe which covers all areas of ophthalmology and the visual sciences. EVER currently has members from over 50 countries and is represented by 11 scientific sections. One of the main activities of EVER is the organizing of a high quality research meeting every October at a location chosen for its access and its agreeable autumn climate. EVER collaborates closely with other societies and encourages them to convene annually with EVER.

In 2010, the EVER Foundation was created to raise money to promote these goals, www.ever-f.eu.

www.ever.be

EUPO - European University Professors of Ophthalmology

EUPO is the organiser of the annual structured subspecialty course for residents in training in Europe since 1988. Most of the ophthalmology curriculum is covered over a 4 year period to allow residents to get an overview of theoretical knowledge during their residency rotation. EUPO courses are held in different places in Europe. The EUPO 2012 course will be on neuro-ophthalmology and strabismus and will take place in Leuven, Belgium.

www.eupo.eu

SOE - Societas Ophthalmologica Europea

SOE aims to promote ophthalmology in Europe and to stimulate co-operation between European ophthalmologists and between their National Societies. Today, its mission is to become a central point in European ophthalmology through education and by fostering collaboration with subspecialty societies and supranational organisations both within Europe and beyond.

www.soevision.org

Long time partners

The following societies are long time partners in the EVER programme

ARVO - Association for Research in Vision and Ophthalmology

In many senses the counterpart of EVER in North America, the purposes of ARVO are to encourage and assist research, training, publication, and dissemination of knowledge in vision and ophthalmology. EVER and ARVO are collaborating in many fields, including an ARVO symposium held every year in EVER and an EVER symposium held in ARVO since 2005, see page 36.

www.arvo.org

FRO - Belgian Fund for Research in Ophthalmology

The aim of the FRO association is to stimulate research in ophthalmology and in visual function by awarding grants to research projects carried out under order of Belgian institutions. The FRO candidates have presented their research work to an international jury during the EVER congress since 2002, see pages 75 and 79.

www.fro-online.org

ISCEV - International Society for Clinical Electrophysiology of Vision

ISCEV was founded in 1958 to promote co-operation and communication amongst workers in the field of clinical and basic electrophysiology. There are about 400 members who are physicians, scientists, engineers, optometrists and other professional personnel. Its major symposium is held annually at different venues throughout the world. The European Chapter of ISCEV has met with EVER since 1998, see page 104.

www.iscev.org

IUSG - International Uveitis Study Group

The International Uveitis Study Group (IUSG) was formed in 1978 by a small number of clinicians who shared a common interest in uveitis. Over the next 30 years the group has increased in size to over 80 uveitis specialists from all over the world. The IUSG comprises researchers and clinicians who are committed to stimulate, encourage, and intensify a concerted effort in research and clinical management of uveitis, with the goal of developing new methods for the diagnosis, treatment, and prevention of the blinding complications of uveitis, see pages 97 and 105.

www.iusg.net

KPro Study Group

The KPro Study Group was established in 1990 to foster clinical and basic research on keratoprosthesis, synthetic corneas and artificial corneal implants. This International Group aims to foster the development and improvement of keratoprosthesis worldwide for the benefit of eyecare and patients. The KPro Study Group is collaborating with EVER since 2004. See page 96.

www.kpro.org

OOG - The Ophthalmic Oncology Group

OOG is an independent scientific workgroup devoted to basic and clinical ophthalmic oncology. It has convened with EVER since 1998. The aims of the OOG are to improve the practice of ophthalmic oncology in Europe, develop internet-based databases to share scientific information, organise multicenter studies and quality control studies, and meetings and other activities with the aim of improving the treatment of eye tumours and knowledge about them. OOG encourages all EVER delegates to take part in its sessions, see pages 97, 102 and 107.

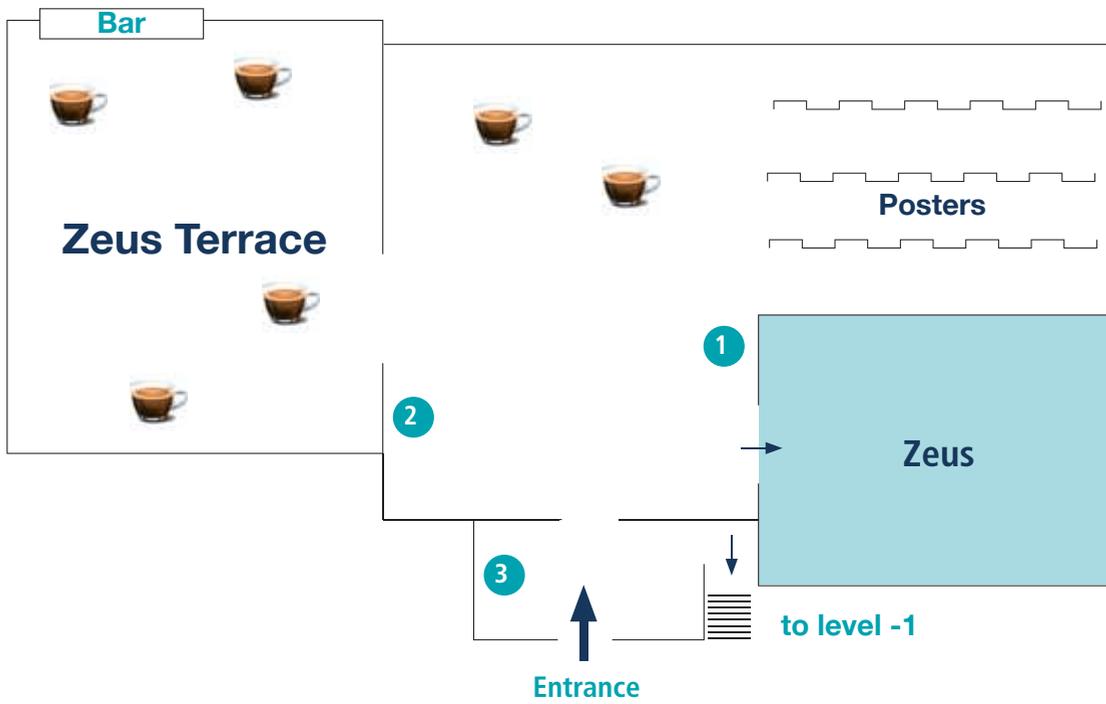

SOIE - Society for Ophthalmology-Immunoinfectiology in Europe

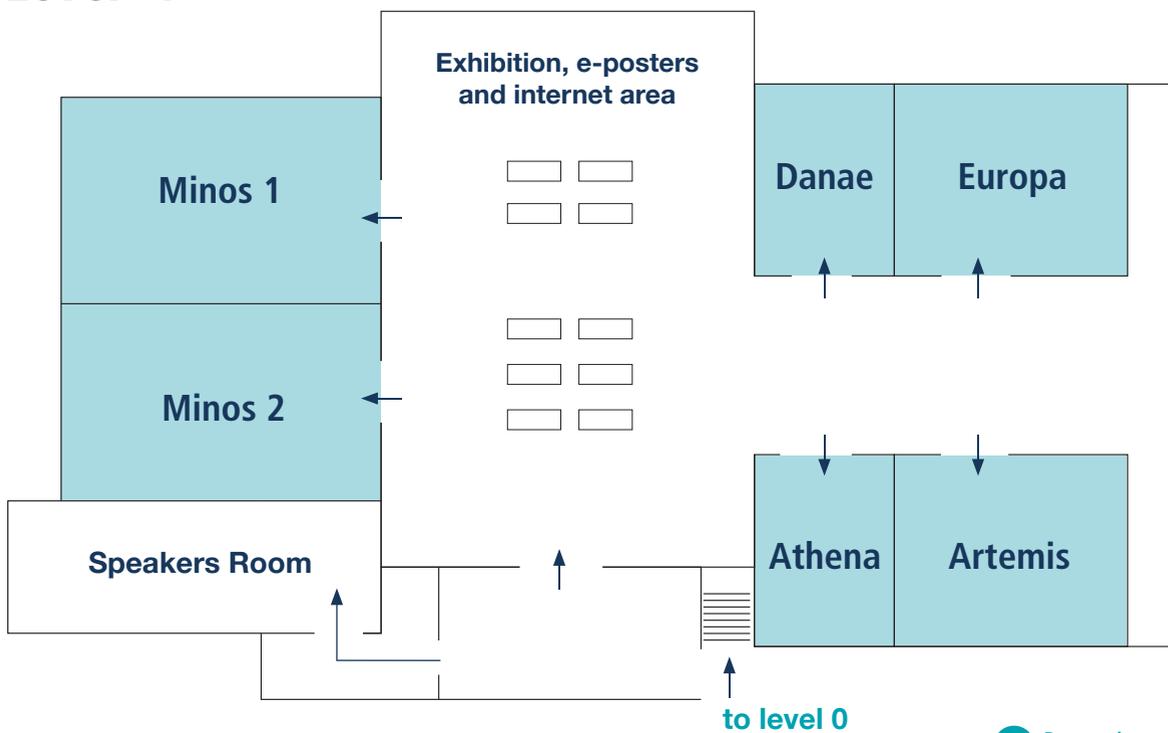

The aims are to form an association of ophthalmologists and other doctors or scientists having an interest in the field of ophthalmology-Immunology and to share mutual experiences in order to contribute to the progress of each member in this field, to promote education by organising or sponsoring symposia or courses or by contributing to publications in this field and to promote contacts between clinical centres in order to realise collaborative studies. SOIE is collaborating with EVER since 2008. See page 41.

Two Days Ophthalmology Residency Program Directors Course in Crete, Greece

The International Council of Ophthalmology (ICO) has a long experience in Residency Programs Directors Educational Courses all over the world. The interactive approach of these courses has allowed participants to acquire practical information and skills, and it improves their residency-training program. Several countries have formed residency program directors' groups to continue efforts in enhancing resident education.

The first course of this kind in Greece will take place at Hersonissos, Heraklion, Crete, Greece, on October 3-4, 2011 at Terra Maris Hotel, www.maris.gr, just prior to the EVER Meeting. The Course is organized by the ICO with the support of the University Eye Clinic of Heraklion, Crete and the Confederation of the Greek Ophthalmological Societies.

The Residency Program Director's Course is designed to improve the participants' teaching and assessing effectiveness. There will be valuable presentations and resources related to new methodologies of residency training.

The meeting is based on active participation. Teaching methods include lecture (25%), small group discussion (35%), and large group discussion (40%). Major topics include adult learning principles, curriculum design, resident assessment and improving teaching skills.

Participants should possess the following qualities:

1. Speak and understand English
2. Be involved with residency education
3. Be interested in improving the quality of their educational program
4. Enthusiastically participate in discussion groups

We encourage all ophthalmologists involved in training programs to participate. We are confident that by attending this course they will benefit through the presentations, resources and discussions with colleagues.

Thanks to the support of the ICO, the University Ophthalmological Clinic of Crete and the EVER, the participants will be able to attend the Course with no registration fees. Moreover, participants who will attend the Course will be able to register in the EVER meeting with a reduced fee.

Looking forward to seeing you in Crete

I G Pallikaris, M K Tsilimbaris, B Spivey, K Golnik

COURSE 1 THE SWOLLEN OPTIC DISC: IS IT TRUE SWELLING, WHAT CAUSES IT AND HOW TO INVESTIGATE IT

Zeus

NSPH

Aki KAWASAKI

Intermediate

This course will provide the attendee the information necessary for evaluating and investigating the patient with unilateral or bilateral optic disc swelling. A series of didactic lectures will review the important points of the history, examination, differential diagnosis and investigative approach. Thereafter, a series of unknown cases will be presented to the audience who will use the information given in the preceding lectures to discuss and solve the case. Each case will emphasize a specific aspect of the evaluation that is important to the differential diagnosis or will highlight a particularly urgent diagnosis that should not be missed. The cases will progress in increasing difficulty so that the attendee learns to use the clues from the history and examination to decide the best approach for determining the cause.

The aim of this course is to give the attendee a practical, updated and multilevel approach to the swollen optic disc in a format that includes both formal teaching and interactive case discussion with experienced experts in the field of neuro-ophthalmology.

12:00	★	1211	Unilateral optic disc swelling: history and examination KAWASAKI A–Lausanne
12:40		1212	Unilateral optic disc swelling: differential diagnosis and evaluation GOLNIK K–Cincinnati
13:20			Break
13:35		1213	Bilateral optic disc swelling: differential diagnosis and approach to investigation LEE AG–Houston

COURSE 2 IN VITRO TECHNIQUES FOR OCULAR CELL BIOLOGY AND TISSUE ENGINEERING

Artemis

ACB

Hannu UUSITALO, Ulla AAPOLA

Intermediate

In vitro methods like cell and tissue cultures are an essential part of basic and translational eye research. These techniques can be used as tools in ocular cell and molecular biology. They have, however an increasing role in disease modeling and tissue engineering. The course will give an overview of vitro techniques used in modern cell and molecular biology. The use of various ocular immortalized cell lines and differentiated pluripotent stem cells in cell biological research, ocular pharmacology, toxicology and tissue engineering will be covered.

12:00		1221	In vitro techniques for ocular cell biology and tissue engineering UUSITALO H–Tampere
12:30		1222	In vitro methods, biomarkers and proteomics in eye research BEUERMAN RW, WEON SR, CHEW J, ZHOU L, ZHU HY, RIAU AK–Singapore
13:00			Break
13:15		1223	How to study autophagy in RPE cells? KAARNIRANTA K–Kuopio
13:45		1224	In vitro techniques for assessing differentiation and functionality of human pluripotent stem cell -derived RPE cells JUUTI-UUSITALO K–Tampere

COURSE 3 COMMON CORNEAL PROCEDURES COS

Harminder S DUA, Jean-Jacques GICQUEL

Athena

Intermediate

The cornea is the first part of the eye that light passes through and is responsible for the majority of the focusing power of the eye (even more than the lens). Just like any other tissue in the body, the cornea is susceptible to inflammation, infections, degenerations, inherited diseases and trauma. Some common cornea procedures include pterygium removal, superficial keratectomy (polishing the superficial part of the cornea to remove diseased tissue) and various forms of corneal transplantation.

12:00	1231	Modern pterygium surgery DUA H–Nottingham
12:24	1232	Limbal stem cell transplantation techniques GICQUEL JJ–Poitiers
12:48	1233	Penetrating keratoplasty DIGHIRO P–Poitiers

13:27	1234	Anterior and posterior lamellar keratoplasty NUBILE M–Chieti
13:51	1235	Indications and limitations of amniotic membrane transplantation DUA H–Nottingham

COURSE 4 EBO REVIEW COURSE: INTRAOCULAR INFLAMMATION AND INFECTION (PART I)

Bahram BODAGHI, Carl P HERBORT

Europa

IM

Intermediate

The aim of this course is to review major topics of intraocular inflammations and infections. A paper composed of multiple choice questions will evaluate the basic knowledge of the participants initially. The test will be followed by 6 consecutive general presentations for the understanding of different uveitis features. The pathophysiology will be described and different classifications will be presented. Clinical characteristics are highlighted. Diagnostic tests are discussed and imaging techniques will revisit the

pathophysiology of different entities involving the retina and the choroid. Important points will be discussed during each practical situation. The course will be interactive allowing general discussion and the participation of the audience. It will be basic and aimed at pathologies that are frequent.

12:00		Pre-test (MCQs)
12:30	1241	Pathophysiology of uveitis DICK A–Bristol
12:45	1242	Classification of uveitis ANDROUDI S–Thessaloniki

COURSE 5 EBO REVIEW COURSE: DIAGNOSTICS OF OPHTHALMIC TUMOURS
PO

Laurence DESJARDINS, Bertil DAMATO

Danae

Advanced

The aim of the course is provide a practical guide to the diagnosis of ophthalmic tumours by clinical examination and judicious use of ancillary tests. Most intraocular tumours can usually be diagnosed by ophthalmoscopy, with the aid of investigations such as ICG and fluorescein angiography, ultrasonography and OCT. Biopsy of intraocular tumours is valuable in selected cases, but special measures are necessary to obtain the best results. Diagnostic algorithms that are specific for adnexal (lid, conjunctiva, orbit) tumours will

be presented. Strategies for the diagnosis of retinoblastoma and phakomatoses will be described. Consideration of the differential diagnosis is especially important and this aspect of patient management will also be considered.

12:00	1261	Diagnosics of adult ophthalmic tumours: role of clinical history, symptoms and signs KIVELÄ T–Helsinki
12:20	1262	Diagnostic tools for adult intraocular tumours ZOGRAFOS L–Lausanne

COURSE 7 CORNEAL INFECTIOUS DISEASES UPDATE

Artemis

COS Jean-Jacques GICQUEL, Harminder S DUA

Intermediate

Acanthamoeba keratitis, infectious crystalline keratopathy, fungal keratitis and atypical mycobacterial keratitis have emerged as important types of infectious keratitis. These corneal infections have often been associated with contact lens wear, with corneal surgery such as radial keratotomy or penetrating keratoplasty and with the uncontrolled use of topical steroids. The clinical setting of each of these infections is important in alerting the clinician to the possible diagnosis. There have been improvements in rapid diagnostic techniques for such infections in the last years. Treatment has also improved, but remains a difficult problem, especially for Acanthamoeba. In this course, we'll give you an overview of recent developments in the clinical and histopathologic methods for diagnosis and treatment options of these corneal infections.

14:30	1321	Corneal bacterial infections GICQUEL JJ—Poitiers

COURSE 10 COS CORNEAL ULCERATIONS: FROM BENCH TO SLIT LAMP

Minos 1

Eric GABISON, Serge DOAN

Intermediate

A corneal ulceration is defined as a disruption of the epithelial layer with involvement of the corneal stroma. A common initiating event in corneal ulcerations of various etiologies including tear film anomalies, toxic reactions, neurotrophic or inflammatory disorders is a delay in epithelial closure leading to a persistent epithelial defect (PED). In the absence of healing, PED progresses toward basement membrane disruption which is a prerequisite for stromal thinning. Proteinases such as the matrix metalloproteinases are known to be overexpressed and have been implicated as mediators in the pathogenesis of this corneal disorder, tilting the ECM remodeling towards proteolysis. The management of corneal ulcerations requires the precise recognition of all the different risk factors involved in delayed corneal healing. Medical and surgical management of this ocular surface disorder may involve the exclusion of any potential iatrogenic treatment, anti-infective agents, epithelial debridement, autologous serum application, inlay or overlay amniotic membrane grafting and lamellar or penetrating keratoplasties. This interactive course will provide updates on the pathogenesis and the therapeutic management of corneal ulcerations.

LC**IONIZING RADIATION AND CATARACT**

Jochen GRAW

Danae

The lens of the eye is recognized as one of the most radio-sensitive tissues in the human body and cataracts are known to be initiated by exposures to relatively low doses of ionising radiation. Recent work on survivors of the Hiroshima atomic bomb and the Chernobyl atomic power plant together with epidemiological work on radiation technologists suggests that the question of the threshold dose for cataract development is open again. In the past, a threshold of approximately 2 Gy was fixed. In this session recent findings on human cataracts will be discussed together with genetically modified mouse models.

COURSE 11 EBO REVIEW COURSE: HOW TO BEGIN WITH THE GLAUCOMAS?

Minos 1

G Alain BRON

Beginner

The glaucomas encompass many clinical presentations with different risk factors and various outcomes. However the clinical examination of a glaucoma patient or a glaucoma suspect follows the basic rules of medicine: collect the symptoms if any and search for signs before giving a diagnosis and/or prognosis. In this basic course, 3 glaucoma experts will give you some practical and very simple tips to enhance your clinical practice with daily tools you have at your fingertips. We strongly recommend reading of the European Glaucoma Society Guidelines (http://www.eugs.org/eng/EGS_guidelines.asp) before attending the course.

17:30	2451	Your first best glaucoma friend, the slit-lamp BRON AM—Dijon
18:00	2452	Your second best glaucoma friend, function testing VISWANATHAN A—London
18:30	2453	Your third best glaucoma friend, structure evaluation SUNARIC MEGEVAND G—Geneva

COURSE 12 CRASH COURSE IN OPHTHALMIC PATHOLOGY

Danae

PO Sarah COUPLAND, Karin LOEFFLER, Steffen HEEGAARD

Intermediate

This course will be run by leading eye pathologists and will provide an overview of important disease processes occurring in the eye and the surrounding ocular adnexa, in both adults and in children. It will be an interactive and case-orientated course, with emphasis on the association between the clinical-pathological findings, and incorporating latest data in the literature. It will briefly outline new methodologies, which are applied in diagnosis establishment and in prognostication in ocular tumours. Comparative ocular pathology in our "furry" and "not-so-furry" friends will also be presented for interest. A fun quiz will conclude the course to highlight important take-home-messages. Participants will receive a course handbook for reference.

17:30	2461	Tips and tricks in grossing and processing ophthalmic specimens COUPLAND SE—Liverpool
17:45	2462	Overview of eyelid and conjunctival tumours LOEFFLER K—Bonn
18:00	2463	Anterior-to-posterior "tour" of ocular disease processes LOEFFLER K—Bonn

G**OCULAR RIGIDITY AND HYDRODYNAMICS OF THE HUMAN EYE**

Anna DASTIRIDOU, Ioannis G. PALLIKARIS

Minos 1

Ocular rigidity characterises the relationship between pressure and volume changes in the human eye and is expressed as a macroscopic coefficient. Ocular rigidity depends on the geometry of the globe as well as on the mechanical properties of its materials. Difficulties in the measurement of ocular rigidity in the living human eye have limited our knowledge on this parameter. However, the accurate assessment of ocular rigidity is important in tonometry, tonography and pulsatile ocular blood flow measurements. Moreover, ocular biomechanics have been implicated in the pathogenesis of glaucoma and age related macular degeneration. This symposium focuses on the techniques for the measurement of ocular rigidity in the human eye, its implications in aqueous humor dynamics and tonography and its clinical associations with ocular disease.

**JOINT M. CONCORDIA: STANDARDS AND CRITERIA IN ACADEMIC
OPHTHALMOLOGY IN EUROPE**

Europa

Marko HAWLINA

Academic career in every branch of medicine as well as in ophthalmology typically consists of three components: professional expertise, research achievements and ability to teach. In European countries, however, criteria to qualify and progress in career are very different. One common requirement for academic career is to obtain a PhD title, yet the requirements to achieve this may be very different in European countries.

Likewise, achieving the level of professor can involve very different requirements across the European countries. This variation involves different numbers and requirements regarding IF of the papers or books published as well as "heraldic" aspects of the post. The aim of this symposium is to compare these standards and requirements across European countries and to see if any harmonization is feasible from both research and educational aspect with the aim to be able to achieve similar and comparable standards in academic ophthalmology throughout Europe.

COURSE 13 OPTICAL COHERENCE TOMOGRAPHY APPLICATIONS IN ANTERIOR SEGMENT EYE DISEASES

Athena

COS

Edward WYLEGALA

Intermediate

Optical coherence tomography has changed ophthalmology practice and approach to ocular diseases. There are many available OCT devices, using the same technology but with distinct differences among them. It is crucial for clinicians to be able to determine which OCT scans provide clinically useful data and to know their basic clinical applications.

This course consists of two parts:

1. To describe OCT technical principles and basic differences among time-domain, spectral-domain and swept-source OCT. To present time-domain and spectral-domain OCT devices and describe their scan parameters and available software:

- Visante® OCT (Carl Zeiss Meditec, Inc.USA)
- Cirrus® OCT (Carl Zeiss Meditec, Inc. USA)
- 3D OCT – 2000 (Topcon Medical Systems,Japan)
- RTVue® - 100 (Optovue, Inc.USA)
- Copernicus® HR (Optopol Technology, Poland)
- SS-1000 CASIA (Tomey, Japan)

2. To present OCT applications based on clinical cases: anterior eye segment photo, clinical details, TD OCT, SD OCT and SS OCT scans, diagnosis and conclusion.

- Corneal dystrophies and hereditary anterior eye segment disorders
- Lamellar and penetrating keratoplasties
- Cataract surgery
- Refractive surgery
- Ocular injuries
- Glaucoma

08:15	4131	Technical principles of optical coherence tomography and basic differences among time-domain, spectral-domain and swept-source OCT WYLEGALA E-Katowice
08:30	4132	Important factors determining reliability and reproducibility of OCT scans; Advantages and disadvantages of commercially available OCT devices WYLEGALA E-Katowice

COURSE 14 ANGIOGRAPHY AND FUNDUS IMAGING IN UVEITIS: PRINCIPLES & PRACTICE

Athena

IM Carl P HERBORT, Moncef KHAIRALLAH

Intermediate

Imaging in Ophthalmology has drastically improved in the last two decades with the availability of indocyanine green angiography (ICGA), optical coherence tomography (OCT) and fundus autofluorescence (FAF) to name the most important modalities. These new methodologies have improved management of posterior uveitis, not only by enhancing diagnostic capacity but especially by allowing precise monitoring of disease evolution and assessing the result of therapeutic intervention. The course will emphasize practical situations and issues. After a first section dealing with the basic principles of the main imaging techniques, the whole second part is devoted to quiz cases coming from several parts of Europe and the Middle East.

11:00	4231	Fluorescein angiography in uveitis KHAIRALLAH M, JELLITI B—Monastir

NEW ADVANCED TECHNOLOGIES FOR OPHTHALMIC APPLICATIONS

Zeus

The symposium will present data of pre-clinical and clinical studies which were performed to study the safety and efficacy of a novel thiolated biopolymer, namely *chitosan-N-acetylcysteine*.

In addition bromfenac's mechanism of action, recent clinical data of pivotal/other bromfenac trials and bromfenac's safety, tolerability and use in combination with corticosteroids will be reviewed.

JOINT M. THE EVER *f* - HOW TO PROMOTE IT, HOW TO WORK FOR IT**Athena**

Harminder S DUA

The EVER *f* is an independent incorporated organization with its own board of trustees. Its aim is to support the EVER mission and to facilitate the attainment of EVER's objectives. 'Science for Sight' also represents the statement of intent of the EVER Foundation.

EVER *f* recognizes the enormous contribution made by the pharmaceutical trade and industry towards supporting science and education. It will consolidate and build on this platform such that EVER *f*, EVER and the Industry can work together to alleviate blindness and vision disorders, for our mutual beneficiaries – our patients.

DEL BUEY MA, LAVILLA L, CRISTOBAL JA, LANCHARES E, MATEO J, ASCASO FJ, RODRIGUEZ A, PEIRO C, MATEO A, RUIZ DE GOPEGUI E—Zaragoza, Valencia
- 412 Peripheral corneal ulceration associated with rheumatoid arthritis
ALMALIOTIS D, KONIDARIS V, STAMOULAS K, GEORGALA A, KARAMPATAKIS V—Thessaloniki
- 413 Clinical and ultrastructural feature of a cornea with pellucid marginal degeneration
AKHTAR S, KIRAT O, KATAN H, ALMUBRAD T—Riyadh
- 414 Analysis of factors affecting corneal endothelial cell loss after penetrating keratoplasty
HOSIK H, KIM MS, KIM EC, KIM TK—Seoul

- 415 Use of hypo-osmolar riboflavin for corneal cross-linking in thin keratoconic corneas
FRUSCHELLI M, BATISTI C, MOTOLESE I, SANGIUOLO M, MENICACCI F, MENICACCI C, MOTOLESE E—Siena, Genova
- 416 Protective antioxidant system disorders in myopic patients
BOYCHUK IM, KOLOMIYCHUK SG, SUROVAYA EI—Odessa
- 417 Ocular surface epithelial thickness evaluation with spectral-domain optical coherence tomography in patients with dry eye syndrome
FRANCOZ M, KARAMOKO I, BAUDOUIN C, LABBE A—Paris
- 418 Analysis of factors affecting the decrease of endothelial cell density of imported donor corneas
HOSIK H, MAN SOO K, EUN CHUL K, SEOK JOON K—Seoul
- 419 Efficacy of amnion membrane transplantation (AMT) on corneal surface in annular abscess and anterior uveitis
KOEV K, GEORGIEV R—Sofia
- 420 A retrospective comparison of enhancement rate between low myopic astigmatism and high myopic astigmatism in patients treated with femtosecond LASIK
CANADAS SUAREZ P, IGLESIAS M, GIMENEZ P, CANONES R, TEUS M—Madrid
- 421 Ocular surface changes and corneal sensitivity in keratoconus
CHO KJ, MOK JW, CHOI MY, JOO CK—Cheonan, Seoul
- 422 A case of lattice corneal dystrophy due to the L527R mutation in the TGFBI gene in Korea
CHO KJ, MOK JW, JOO CK—Cheonan, Seoul
- 423 Changes in expression of matrix metalloproteinases 12 and 19 in corneal epithelial cells after UV irradiation
ARDAN T, CEJKOVA J—Prague

Immunology / Microbiology**Moderators:****Piergiorgio NERI, François WILLERMAIN**

- 424 *rf* ★ Anti-inflammatory mechanisms of mapracorat, a novel selective glucocorticoid receptor agonist, in human conjunctival fibroblasts
ZHANG JZ, VOLHEJN SM, WARD KW—Rochester
- 425 *rf* Skin tattoos and the development of uveitis
VAN CALSTER J, VANDER HULST K, GOOSSENS A, VAN DEN OORD J, JACOB J, VAN GINDERDEUREN R—Leuven

 WALKER C, LANGAN B, HORGAN N, CUNNINGHAM M, GRUNNER E, MCCLEAN B

443 Orbital involvement in multiple myeloma
 FERNANDEZ-PEREZ S, SATUE M, HERRERO LATORRE R, DE LA MATA G, IDOPE M, GARCIA-MARTIN E, PABLO L—Zaragoza

444 Atypical inflammatory myofibroblastic pseudotumour of the ethmoidal sinus extending into the orbit
 DE KEIZER RJW, LAUWERS N, DE GROOT V, CLAES J—Edegem Antwerp

445 Extraskeletal chondroma of the palpebral conjunctiva: a case report
 JUNGJIN L, HYOJEONG K, SANGWROUL S—Seoul

446 Incidence of eyelid cancers in Singapore - a 13-year review
 LIM VSY, AMRITH S—Singapore

447 Treatment of an infantile hemangioma with propranolol
 PEREZ GARCIA D, IBANEZ J, REMON L, RAMIRO P, PEIRO C, PINILLA I, CRISTOBAL JA—Zaragoza

448 Treatment and visual outcome in orbital and palpebral hemangiomas of infancy
 PINELLO L, MAZZAROLO M, DE CORTI F, LUZZATTO C—Padua

Physiology / Biochemistry / Pharmacology

Moderators:

Neville OSBORNE, Miltiadis TSILIMBARIS

449 Cationic oil-in-water emulsions protect and restore function of the injured ocular surface
 ★

 DAULL P, LIANG H, BAUDOIN C, GARRIGUE JS, BUGGAGE R, BRIGNOLE-BAUDOIN F—Evry, Paris

450 Ghrelin expression in the rat's eye
 ROCHA DE SOUSA AA, PEREIRA-SILVA P, AZEVEDO-PINTO S, PINHO S—Porto

451 Cystoid macular oedema in a phakic eye treated with bimatoprost for presumed normal tension glaucoma
 COUTTS SJ, GHAZI-NOURI S—Chelmsford

452 Cyclosporine A-loaded and limbal stem cell-seeded nanofibers for the local suppression of inflammatory and transplantation reactions
 HOLAN V, ZAJICOVA A, CHUDICKOVA M, LENCOVA A, TROSNAN P, SVOBODOVA E, KRULOVA M—Prague

453 Axitinib modulates hypoxia-induced blood-retina barrier permeability and expression of growth factors
 KERNT M, THIELE S, LIEGL RG, HARITOGLOU C, ULBIG MW, KAMPIK A—Munich

454 Gangliosides of the retina
 MASSON E, BRETILLON L—Dijon

455 Pasireotide (SOM230) protects the retina from ischemia induced retinopathies
 KOKONA D, MASTRODIMOU N, PEDIADITAKIS S, CHARALAMPOPOULOS I, SCHMID HA—Heraklion, Basel

456 Investigation of the liquid in- and outflow parameters of the human eye using a modified strategy of the mechanical loading test
 MOISEEVA IN, LYUBIMOV GA, STEIN AA, IOMDINA EN, NAZARENKO LA—Moscow

- 457 Optic nerve head blood flow response to increase of arterial blood pressure in humans
LACHARME T, GEISER M, ALMANJOURI A, KHAYI H, ARNOL N, ROMANET JP, CHIQUET C—Grenoble, Sion
- 458 A novel device for the measurement of intraocular pressure, ocular rigidity and pulsatile blood flow.
KARYOTAKIS NG, GINIS H, TSILIMBARIS MK, SIGGELAKI EM, PALLIKARIS IG—Heraklion
- 459 Effects of benzalkonium chloride on antigen presenting cells in vitro
MICHEE S, ROSTENE W, BRIGNOLE-BAUDOIN F, BAUDOIN C, LABBE A—Paris
- 460  Effect of lacritin, a novel glycoprotein, on ocular surface and tear film integrity
SAMUDRE S, LATTANZIO F, WILLIAMS P, MCKOWN R, LAURIE G—Norfolk, Harrisonburg, Charlottesville

Vision Sciences / Electrophysiology / Physiology Optic

Moderators:

Guillermo PEREZ, Werner SPILEERS,

Miguel CASTELO-BRANCO

- 461  ElVisWeb: an interactive web-application for the visualization of ERG recordings based on the Electrophysiology of Vision Markup Language
STRASSER T, GOLDINA A, LANG S, LOTTER M, ODER M, OSTERTAG T, ULRICH M, WALTER M, YILDIZ D, PETERS T, ZRENNER E—Tuebingen, Augsburg
- 462 Asymmetric color perception in the shopping aisle: some implications for merchandising
PINNA A, PUGLIATTI M, PORCHEDDU D—Sassari
- 463 Glare visual performance in young subjects under night driving conditions
PEREZ CARRASCO MJ, PUELL MC, PALOMO-ALVAREZ C, BARRIO AR, GONZALEZ-RUGARCIA A, LOPEZ-SERRANO T—Madrid
- 464  Electrophysiological assessment of fundus albipunctatus
PAWLOWSKI P, SUWALA M, BAKUNOWICZ-LAZARCZYK A—Bialystok
- 465 Colour vision in adult amblyopia
BLACK JM, LUN V, PHILLIPS G, THOMPSON B—Auckland
- 466 Prevalence of uncorrected refractive errors among schoolchildren in northeast of Iran
YEKTA AA, KHABAZKHOOB M, AZIZI E, OSTADI MOGHADDAM H, HERAVIAN J, AZIMI A, YEKTA R—Mashhad, Tehran
- 467 How does Bangerter filter affect the normal visual perception?
LI J, DING Z, DENG D, CHAN YLL, BENJAMIN T, CHEN X, HESS RF, YU M—Guangzhou, Hong Kong SAR, Auckland, Montreal
- 468 Halo size in healthy subjects
PUELL MC, RODRIGUEZ-ORTEGA J, PEREZ-CARRASCO MJ, PALOMO-ALVAREZ C, BARRIO AR—Madrid
- 469 A new method for assessing central and peripheral visual acuity
CHUNG H, LEE YW, SEO JM—Seoul, Pohang

Acta Ophthalmologica
Edited by: Einar Stefánsson

EVER
The Association for Research in Vision and Ophthalmology

Why should you be reading?

- Impact – our impact factor continues to increase and now stands at 2.809*, placing us amongst the most highly-cited ophthalmology journals.
- Coverage that's relevant to you – encompassing all aspects of the anatomy, function and diseases of the eye.
- Official publication of EVER and all five Nordic Ophthalmological Societies.

Members of EVER receive FREE online access to Acta Ophthalmologica as part of their membership.

Visit www.actaophthalmologica.com for more information

WORLD OPHTHALMOLOGY CONGRESS® 2012

XXXIII International Congress of Ophthalmology ® 2012

12th International Congress of the Middle East Africa Council of Ophthalmology (MEACO)

HIGHLIGHTS

- More than **500 scientific sessions**, including symposia, case studies, courses and interactive programs.
- New special sessions, including the ICO Quiz, 3-D Stereotactic Anatomy Course, Ophthalmic Premier League and much more!
- A subspecialty day for Cataract, Refractive Surgery, Glaucoma, Retina, Pediatric Ophthalmology, Oculoplasty.
- More than **2000** internationally recognized speakers.

Monday October 3 / Tuesday October 4, 2011							
ICO Residency Program Directos Course							
Wednesday October 5, 2011							
12:00 - 14:45	NSPH: The swollen optic disc: is it true swelling. What causes it and how to investigate it Aki KAWASAKI	ACB: In vitro techniques for ocular cell biology and tissue engineering Hannu UUSITALO Ulla AAPOLA	COS: Common corneal procedures Harminder S DUA Jean-Jacques GICQUEL	IM: EBO review course: Intraocular inflammation and infection (Part I) Bahram BODAGHI Carl P. HERBERT	PO: EBO review course: Diagnostics of ophthalmic tumours Laurence DESJARDINS Bertili DAMATO		
14:30 - 16:45	COS: Facial nerve palsy: anatomy, etiology, evaluation, and management Ioannis MAVRIKAKIS	COS: Corneal infectious diseases update Jean-Jacques GICQUEL Harminder S DUA	COS: Basic keratoprostheses Christopher LIU	IM: EBO review course: Intraocular inflammation and infection (Part II) Bahram BODAGHI Carl P. HERBERT			
Welcome Ceremony in ZEUS							
17:00 - 17:15	Welcome by the President EVER 2011 - Lene MARTIN						
17:20 - 18:00	EVER Lecture: Spot the difference! The electrophysiological differentiation of retinal fleck and spot disorders - Graham HOLDER						
18:05 - 18:20	European Ophthalmologic Heritage Lecture: The development of microkeratomes from the very early ages, with handmade and mechanical systems, until the fempto - laser technology today - Ioannis PALLIKARIS						
18:25 - 19:00	Keynote Lecture 1: Ocular surface and refractive surgery - Béatrice COCHENER						
19:00 - 21:00	EVER Welcome Reception						
Thursday October 6, 2011							
08:15 - 09:45	RV: Cholesterol and retina: news and views Lionel BRETILLON	MBGE: Functional studies of cellular & molecular dysfunction Seang-Mei SAW Graeme C M BLACK	ACB: Retinal cell growth, death and survival Airo URTTI Neville OSBORNE	IM: EVER/ARVO : Antigen presenting cells in the eye in health and disease SallyATHERTON	COS: Corneal ulcerations: from bench to slit lamp Eric GABISON Serge DOAN	LC: Ionizing radiation and cataract Jochen GRAW	COS: Refractive surgery and quality of vision Ioannis G. PALLIKARIS Beatrice COCHENER
10:00 - 10:45	Keynote Lecture 2: Clinical and molecular genetic aspects of optic nerve hypoplasia - Elias TRABOULSI						
11:00 - 12:30	RV: Diabetic retinopathy Jost B JONAS Anat LOEWENSTEIN	MBGE: New disease genes & mutations Bart LEROY Marcela VOTRUBA	ACB: Cell biology of retinal pigment epithelium Hannu UUSITALO Kai KAARNIRANTA	IM: Uveitis: from practice to principles Carl P. HERBERT	G: Visual field and risk factors Anarath VISWANATHAN Thierry ZEYEN	NSPH: Free Papers Andrzej GRZYBOWSKI Aki KAWASAKI	COS: Refractive surgery for EVER Beatrice COCHENER Jean-Jacques GICQUEL
12:35 - 13:35	Lunchtime CIS - THEA - What's new in 2011 in antibiotherapy?						
13:45 - 15:15	RV: Surgical retina Catherine CREUZOT Constantin POURNARAS	MBGE: Update on ocular genetics - part 1 Bart LEROY Graeme CM BLACK	ACB: The eyelid margin – a fresh view on an important structure Erich KNOP Nadja KNOP Johannes NEPP	IM: Applications of PCR in infectious ocular disease Christophe CHIQUET Marc LABETOUILLE	G: Controversies in glaucoma Sayeh POURJAVAN Veva DE GROOT Andrzej GRZYBOWSKI	LC: Free Papers Lens Alfred WEGENER Ralph MICHAEL	COS: Keratoconus and corneal grafting Jean-Jacques GICQUEL Jean-Louis BOURGES
15:30 - 16:10	European Vision Award 2011 lecture: From comfort to pain: neural basis of ocular surface sensations - Carlos BELMONTE						
16:15 - 17:25	Poster Session 1: Anatomy/Cell Biology - Glaucoma - Lens and Cataract - Molecular Biology / Genetics / Epidemiology						
17:30 - 19:00	RV: Macular edema in vein occlusion Catherine CREUZOT	MBGE: Update on ocular genetics - part 2 Bart LEROY Graeme C M BLACK	ACB: immunology and inflammation at the ocular surface Erich KNOP Robert A SACK Nadja KNOP	NSPH: Controversies in neuro-ophthalmology and pediatrics Andrzej GRZYBOWSKI Dominique BREMOND-GIGNAC	G: EBO review course: How to begin with the glaucomas? Alain BRON	PO: Crash course in ophthalmic pathology Sarah COUPLAND Karin LOEFFLER Steffen HEEGAARD	COS: Management of conjunctival cicatrizing diseases and severe ocular surface dysfunction Harminder S DUA Jean-Jacques GICQUEL

	Zeus	Artemis	Athens	Europa	Minos 1	Danae	Minos 2
Friday October 7, 2011							
08:15 - 09:45	RV: Anti-VEGF agents for various ocular pathologies Constantin POURNARAS Efstratios MENDRINOS	PBP: Anterior chamber Nicholas DELAMERE Gerhard GARHOFER	ACB: Anterior segment anatomy and therapy possibilities Erich KNOP Tanja ILMARINEN	IM: Immune modulation in corneal transplantation Thomas FUCHSLUGER Uwe PLEYER	G: Ocular rigidity and hydrodynamics of the human eye Anna DASTRIDOU Ioannis G. PALLIKARIS	LC: Ocular oxidative stress Per SÖDERBERG Marjorie F LOU	COS: Wavefront aberrometry and quality of vision symposium Jean-Jacques GICQUEL Pierre Jean PISELLA ZEUS
10:00 - 10:45	EVER-Acta Lecture: Clouding lens, swap or stop? - Per SÖDERBERG						
11:00 - 12:30	RV: AMD Anita LEYS Gisele SOUBRANE	PBP: Vascular aspects of glaucoma - what to look at? Leopold SCHMETTERER	ACB: Cell biology of ocular surface Hannu UUSITALO Roger BEURMAN	CONCORDIA: Standards and criteria in academic ophthalmology in Europe Marko HAWLINA	VEP: Binocular vision & stereopsis: Why two eyes are better than one! Franziska RAUSCHER	PO: Complications of intra irradiation treatment of intra ocular tumours Leonidas ZOGRAFOS	COS: Update on techniques in corneal and ocular surface surgery Mario NUBILE Jean-Jacques GICQUEL
12:35 - 13:35	RV Irene BARBAZETTO	MBGE/ PBP PBP: Intravitreal treatment Miltiadis TSILIMBARIS Neville OSBORNE	ACB/ VEP FRO - Belgian Fund for Research in Ophthalmology 1 Philippe KESTELYN	IM/ NSPH NSPH: Update in Management of Graves' orbitopathy Antonella BOSCHI Aki KAWASAKI	G G: Eye and brain in glaucoma Georg MICHELSON Doina GHERGHEL	LC/ PO PO: Pathology/Oncology 1 Theodora HADJISTILIANOU Martine J JAGER	COS COS: Cell therapy in cornea - Moving towards individualized treatment Thomas FUCHSLUGER Harminder S DUJA ZEUS
13:45 - 15:15							
15:30 - 16:10	Ophthalmic Research Lecture: Road to fulfillment (not perdition): taming immune response to restore vision - Andrew D DICK						
16:15 - 17:25	Poster Session 2: Neuro-ophthalmology / Strabismology / Paediatric / History - Retina / Vitreous						
17:30 - 19:00	PBP: Retinal oxygenation and blood flow Sveinn HARDARSON Gerhard GARHOFER			IM: The new decade: immune modulation in eye diseases Uwe PLEYER Andrew DICK	G: Secondary glaucomas Sayeh POURAVAN K. Sheng LIM	PO: Management of small choroidal melanocytic lesions Laurence DESJARDINS Tero KIVELÄ	COS: Corneal bioengineering Thomas FUCHSLUGER Christopher LIU
Saturday October 8, 2011							
08:15 - 09:45	RV: Retina Eberhart ZRENNER Irene BARBAZETTO	PBP: Blood flow Leopold SCHMETTERER Gerhard GARHOFER	COS: Optical coherence tomography applications in anterior segment eye diseases Edward WYLEGALA	IM: Pediatric uveitis and arthritis: impact on vision and life - life long! Friederike MACKENSEN	G: Surgery Alain BRON K. Sheng LIM	PO: Pathology/Oncology 2 Steffen HEEGAARD Karin LOEFFLER	COS: Cornea and ocular surface - inflammation 1 Dominique BREMOND-GIGNAC Anthony J. BRON ZEUS
10:00 - 10:45	Keynote Lecture 3: Genetics and treatment of Stargardt disease - Rando ALLIKMETS						
11:00 - 12:30	RV: Retinal detachment surgery Constantin POURNARAS Efstratios MENDRINOS	VEP: Doctor I can't see in the dark Graham HOLDER	IM: Angiography and fundus imaging in uveitis: principles & practice Carl P HERBERT Moncef KHAIRALLAH	IM: How to get your work published? Uwe PLEYER Harminder S DUJA IM: Uveitis Award Ceremony Manfred ZIERHUT	G: Cataract and glaucoma surgery, combined or not? Thierry ZEYEN	OOG Presentations 1 RWJ DE KEIZER Nikolaos E. BECHRAKIS	COS: Keratoprosthesis update Christopher LIU
12:35 - 13:35	Lunchtime CIS - CROMA: New advanced technologies for ophthalmic applications						
13:45 - 15:15	RV: CME: Pathogenesis and management Gabriel COSCAS Gisele SOUBRANE	VEP: Free Papers Werner SPILLEERS Miguel CASTELO-BRANCO	LC: Restoration of accommodation Rafael I. BARRAQUER Ralph MICHAEL	IM: Ocular immuno-infectiology from basic science to clinical challenges Piergiorgio NERI Carl P HERBERT	G: Imaging Jost B JONAS Fotis TOPOUZIS	OOG Presentations 2 Eduardo MIDENA Nathalie CASSOUX	COS: Cornea and ocular surface, inflammation 2 Harminder S DUJA Mario NUBILE
15:20 - 16:25	Poster Session 3: Cornea / Ocular Surface - Immunology / Microbiology / Pathology / Oncology - Physiology / Biochemistry / Pharmacology - Vision Sciences / Electrophysiology / Physiology Optic						
16:30 - 18:00	RV: Retinal detachment complications Elias FERETIS	VEP: ISCEV Session Graham HOLDER	The EVER f - How to promote it, how to work for it Harminder S DUJA	IM: Virus and anterior uveitis Manfred ZIERHUT Sofia ANDROUDI	The Vision Screens in the European Mouse Clinics Jochen GRAW	OOG : Business meeting Sarah COUPLAND	COS: The optics of the tear film Jean-Jacques GICQUEL
18:00 - 19:30	EVER General Assembly and Prize Giving						
20:00 - 23:00	EVER Farewell Dinner						

THANK YOU SPONSORS

EVER wishes everyone of its past and present sponsors good future for the coming years and thanks especially the following companies, many of which are our long-term supporters, for their generous sponsorship in 2011. Thanks to their kind support EVER can continue to encourage research and dissemination of knowledge concerning the eye and vision by means of meetings, publications and exchange of information.
